## MODULE REQUIREMENT SHEET

Revised 10/03/2018.  
All previous Requirement Sheets are obsolete.

1. Completely fill out the MCR Contest Form (#901) found on the MCR WebSite or available in the Contest Room. Include if your module is for Display Only; or if it is T-Track or Other.
2. Obtain a brightly colored "J" tag from the contest committee when the MCR Contest Form is turned in.
3. The Comest committee with write and entry number on the "J" form.
4. You should enter the name of your module in the space provided.  *{{If the other contests the name of the entrant is NOT to be displayed - this is different the the form Steve provided}}*
5. Hang the brightly colored "J" sheet on the most visible section of your module(s).
6. Photographs of the winning modules will be taken after the awards ceremony. All entrants should keep the brightly colored "J" sheets a-fixed to the front of their modules so the camera crew can find them quickly.

Some other things:

That is the maximum numbers of modules a person or group can enter for judging?

If a group is entering a module, should one person, or one person with group name in brackets, or the group name be used to sign in? I'm thinking of the claim check.

If more than one module is entered can they all have the same name? Can some of them have different names? Should multiple modules be kept together?

Can/should multiply modules be judged separately or together?

How large is the "J" sheet? I would think it might be as tall as the front fascia.

I'm thinking about this out of ignorance. Forgive me if this is all self event to you.
